

LANCE ANDREI ESPINA

FULL STACK .NET DEVELOPER

0976 614 0473 | lanceespina478@gmail.com | [Portfolio link](#)

SUMMARY

Full-stack .NET developer with 6+ years of experience building government and enterprise information systems. Backend Developer/Software Engineer at Accenture on a Singapore-based project (2024-2025); now working full-time as an independent freelance developer and NCSC Project Development Officer III with Blazor WebAssembly, ASP.NET Core, Angular, Clean Architecture, Docker, and MSSQL. Strong track record shipping SOLID, well-tested, production-grade software.

SKILLS

- | | | |
|----------------------|---|-----------------------------------|
| • ASP.NET Core | • Asp.Net Blazor / Blazor WebAssembly | • Asp.Net Razor |
| • Asp.Net MVC | • Entity Framework Core | • Microsoft SQL Server |
| • MySQL | • Angular 22 | • HTML/CSS |
| • REST API | • MediatR / CQRS | • FluentValidation |
| • Clean Architecture | • JWT Authentication | • Two-Factor Authentication (OTP) |
| • SignalR | • Docker | • Azure |
| • Azure Repository | • CI/CD | • GIT |
| • Swagger / OpenAPI | • PDF & Excel Reporting (QuestPDF, ClosedXML) | • Unit Testing |
| • SOLID Principles | • KAFKA | • Desktop Application Development |
| • AI | | |

WORK EXPERIENCE

Freelance Software Developer / NCSC Project Development Officer III

October 2025 - Present

Freelance / Independent Contractor / Contract of Service | Blazor WebAssembly, Angular 22, ASP.NET Core, EF Core, MSSQL, MediatR, FluentValidation, SignalR, Docker

- Design and build full-stack information systems end-to-end for independent clients, using Blazor WebAssembly and ASP.NET Core Web API on a Clean Architecture and CQRS (MediatR) foundation.
- Implement JWT-based authentication with two-factor verification (OTP), real-time features with SignalR, and automated PDF/Excel report generation, while containerizing applications with Docker for consistent, repeatable deployments.
- Currently building Vendo POS, a multi-store point-of-sale platform for retail stores, coffee shops, and pharmacies, using Angular 22 and an ASP.NET Core Web API on the same Clean Architecture pattern, containerized with Docker and backed by MSSQL.

Software Engineer/ Backend Developer (Docker, Kafka, Azure, Git, C#, .Net, MSSQL, ASP.Net, Angular, HTML/CSS)

October 2024 - October 2025

Accenture Singapore Based Project

- Delivered robust and scalable backend software as a developer on a Singapore-based project, applying advanced industry coding techniques across Azure, Git, Azure Repositories, C#.NET, Angular, HTML/CSS, Docker, and MSSQL.
- Adhered to SOLID principles and authored comprehensive unit tests prior to every deployment to the development environment.

Information Technology Officer I (C#, Winforms, Angular, ASP.Net Core, EF Core, MVC, DevExpress, GitHub)

January 2024 - October 2024

Department of Social Welfare and Development

- Developed an information system managing millions of data points across the entire Caraga region in Mindanao, using a C# Windows Application for complex transactions and ASP.NET Razor with Syncfusion UI components for information viewing and data entry.

Computer Programmer II (C#, Angular, Winforms, Desktop Application, MySql)

May 2023 - January 2024

Department of Social Welfare and Development

- Developed a queuing system that significantly improved overall transaction efficiency by managing all entities for a seamless, organized process flow.

I.T. Programmer (C#.NET, Adobe Products)

September 2021 - May 2023

Local Government Unit Carrascal

- Served as graphic designer and photographer while developing computer innovations to support Local Government Unit of Carrascal operations.

I.T. Technician/Programmer (C# Winforms, MySql, MSSQL)

June 2020 - September 2021

CTP Shipping Lines Corporation

-
- Developed multiple systems - including a biometric daily time record system with RFID and other information systems - that transformed the company into a fully digital-savvy organization with efficient, seamless transactions.
-

I.T. Specialist (Networking, C#.NET, Winforms, SEO, MSSQL)

May 2019 - May 2020

South-pole Central Hotel

-
- Managed network infrastructure, computer hardware, and CCTV systems while serving as the hotel's SEO specialist.
-

I.T. Software Developer Internship (C#.NET, Winforms, PHP, Mysql, HTML & CSS)

October 2018 - January 2019

Strategic Network Inc.

-
- Developed an accounting and payroll system, gaining hands-on experience under a professional IT team.
-

EDUCATION

Bachelor of Science in Information Technology

2015 - 2019

North Eastern Mindanao State University

CERTIFICATION

-
- Strategic Skill Enhancement Training: Fostering Professional Growth, Well-Being, and Collaborative Synergy For Modern IT Teams
 - Virtual training for website development using WordPress content management system (CMS) and government website template (GWT)
 - Software Quality Assurance Roadshow
-
